DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, are drawn to an optical system, classified in class 359, subclass 351.
 - II. Claims 17-28, are drawn to a scanning device, classified in class 348, subclass 96.
 - III. Claims 29-37, are drawn to a portable telecine, classified in class 359, subclass 663.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as film projection, while invention II can simply be used for document scanning, in addition to film scanning, while invention III is the combination of I and II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, or III, restriction for examination purposes as indicated is proper.
